

# The Future of E-Business Suite

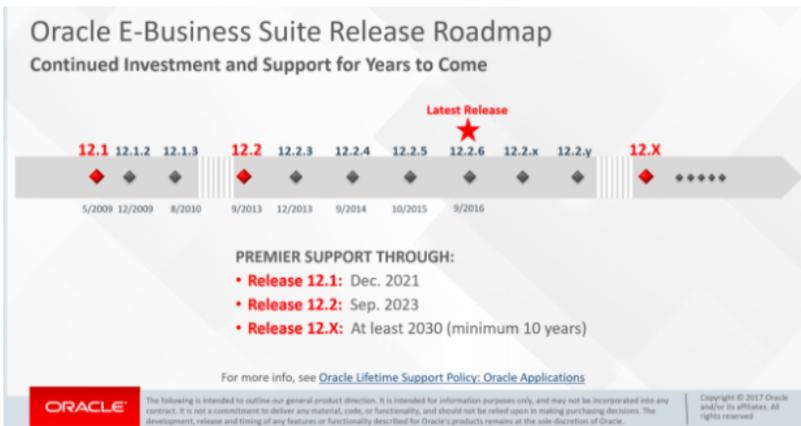

## Let's get digital.

There are many reasons to move to a cloud environment. Topics include: improved business agility, newfound efficiencies, and significant cost reductions. And of course, there is keeping your competitive advantage in the new digital economy.

With so many questions about the future of Oracle E-Business Suite and so many options for modernizing your EBS instance, it pays to work with a partner that can provide insights and guidance across the full spectrum of options.

The time is right for Oracle E-Business Suite customers to take advantage of migrating to the cloud. Great news for EBS customers who are interested in continuing to leverage their current EBS investment. As reference, the table below charts the current Oracle E-Business Suite releases and their support timelines:

### Continued Support Extended to 2030

## Accelerated Methodology and Framework

Keste offers EBS expertise with proven solutions to:

### ASSESS

where you are  
(systems, people, etc.)

### DETERMINE

where you want to go  
(business needs, budget, time)

### FORMULATE

a plan that gets the organization to a modern, scalable, business-centric system quickly and cost-effectively

## Say Yes to EBS - Modernize Your Path to Cloud

**Myth:** The assumption is a mandatory move to ERP cloud

**Reality:** A cloud strategy exists that leverages your current EBS environment

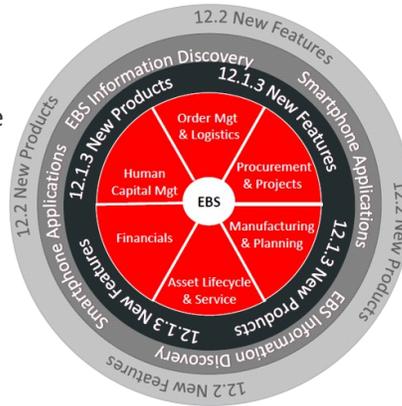

# Modernization Strategies

## Upgrade

Keste helps you determine how prepared you are for an EBS upgrade and shows you how to accelerate your upgrade and reduce risk. Our EBS experts will work with you to efficiently upgrade your EBS application to the release that best meets your current needs and positions you for the future.

### Features:

- Reduce customization and improve automation
- Low Impact on Business Users
- High Impact on DBAs and Technical Team
- Code Standards Enforced which might require remediation
- Online Patching
- Additional Features and Products

## Hybrid Cloud

Hybrid cloud solutions enable you to take advantage of best-of-breed functionality in the cloud while maintaining your core EBS functionality on premise. Keste works with you to develop and execute an intelligent hybrid-cloud strategy that seamlessly integrates the individual components.

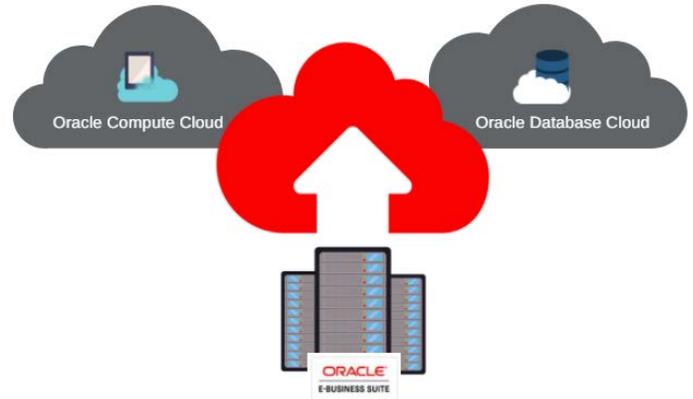

Making hybrid cloud work for you

## Move to EBS on the Cloud

There are a number of alternatives (including Oracle's new Oracle Cloud Infrastructure, OCI, Services) for moving your entire EBS application to the cloud. Keste experts will make sure you understand the benefits of each alternative and help you execute your transition to the cloud.

EBS on Oracle Cloud Infrastructure (OCI)

### Our Promise

We work for you and with you to ensure your Oracle EBS application is performing optimally and that you are well-positioned to transition to the cloud if and when you are ready. Learn more at <http://www.keste.com/ebs/>
