

Maximizing the Power of the Cloud

Your Salesforce implementation must evolve via ongoing customizations and configurations in order to adapt to ever-changing business requirements.

You need an ongoing support and maintenance solution that can support that evolution.

Keste's Managed Services Program for Salesforce is just such a solution. It is one of the best ways to maximize the cloud's value proposition by providing an ongoing, flexible support model.

With Keste, you will get a different type of managed services program; one that will provide a bank of hours — at competitive rates — to be used at any time, with no minimum hourly requirements.

Keste's consultants are local. We will provide you with a single point of contact who will work hand-in-hand with both business owners and IT support staff to ensure that all company objectives are met.

HOW IT WORKS:

- Purchase a bank of hours from Keste to support or enhance your Salesforce solution.
- If enhancements are required, an estimate of work is provided for approval.
- Billing will occur only for work that is actually performed.
- No hourly minimum is required per month.

BENEFITS:

- Readily available consulting organization at your fingertips.
- Locally-based consultants at competitive rates.
- Single point of contact, improving speed, communication and customer service.

HIGHLIGHTS

KESTE OFFERING
