Key Differentiator

Our digital transformation expertise transcends platforms. We develop customized solutions with our client's software of choice or recommend the best platforms for their needs.

"Keste provided thoughtful orientation through workshops and pain point reviews - critical to orienting our frame of reference as we began the project. Keste is the right partner for us."

- IT Director, Maritz

Challenge

Maritz was facing a situation of aging hardware, overloaded IT staff, and complex system processes. Key challenges included:

- Aging hardware struggled to keep up with 27 key on-premise applications, slowing down critical business operations
- Legacy systems required substantial, expensive maintenance and disaster recovery became elongated
- Complex, manual reporting processes hindered decision making and forecasting

Key stake holders identified a platform for improvement, but they needed advisory and support resources to implement a solution for their specific use case.

Solution

Keste modernized Maritz applications and implemented a Cloud-based solution for their operations to run fast and efficiently. Solution included:

- Migrating legacy on-premise systems to the Cloud reducing maintenance time and costs and enabling limitless scale
- Automation reduced errors and sped up processes from hours to minutes
- Implementing over 100 integrations improved data quality
- Modern interfaces enabled instant reporting capabilities for business leaders to make critical decisions quickly
- Solution is flexible to grow with the business
