Create New Revenue Streams Using Embedded Analytics

Work with Argano to unlock the value of deeper, actionable data insights

Organizations are constantly seeking solutions that will deliver actionable application data insights more quickly. Yet, many do not have the time or resources to develop a solution, that scales quickly and easily on their own. In addition, even organizations who are able to create their own service are often challenged by how long it can take to prepare data for analytics. Overcome these obstacles by working with Argano to develop and implement an Amazon QuickSight Embedded Analytics solution that seamlessly integrates with your existing applications and web portals, provides visibility into previously hidden data, and simplifies the analysis process using interactive visualizations and dashboards.

Benefits

1-click embedding

Seamlessly embed rich, interactive dashboards in applications and portals without needing to call embedding APIs.

Send custom branded email reports

Customize the email sender domain for email reports sent from Amazon QuickSight, the logo and header color of the email, and the footer text.

Enable deeper data insights

Enable users to author, publish, and share their own dashboards and reports to get the answers they need to specific questions.

Easy to manage

Amazon QuickSight's serverless architecture and APIs enable programmatic management of analytics workflows.

About AWS QuickSight with Argano

Argano's strategic implementation and integration services can help you turn your mountains of data into actionable insights powered by AWS QuickSight and other AWS tools, including AWS S3, Redshift, Athena, and Glue Crawler. By utilizing well-honed best practices and these powerful tools, we've helped numerous customers across a variety of industries transform their data into valuable business insights.

Uncover valuable data insights to tap into unrealized opportunities

Amazon QuickSight makes it quick and easy to embed interactive dashboards and visualizations into your applications, without having to build your own analytics capabilities. Amazon Web Services (AWS) and Argano can help design and implement solutions that seamlessly blend analytics into existing apps using your brand and themes for a consistent, personalized customer experience. Uncover new opportunities to monetize your data and help customers unlock new insights directly within your applications.

About Argano

Argano is a next-generation business and technology services provider that builds the Digital Foundations that make businesses run better. Argano has been purpose-built for the Digital Renaissance helping companies think differently about how they deploy and manage people, processes and technology.
